3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☒ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

**1. Claims: 1-12**

System and method for rendering CLPs in a 3D-to-2D mapping. Determination of occlusion/visibility of the CLPs. The colour portion of the CLPs can be replaced by "information" which is then used to access an occlusion counter.

**2. Claims: 13-15**

A graphical PU and data point for 3D-to-2D mapping. The colour portion of a data point (pel) can be replaced by "information" that "may" be used when said data point "may" be stored.  
No mention of CLPs.
